

Compatible Generator Guide

Below is a list of generators that have been researched to date for compatibility with the GenerLink transfer switch. The list is in alphabetical order by manufacture name and model number of the generator. To determine if a generator is compatible please refer to the fifth column from the left titled "Compatible". Yes indicates the generator is compatible with the GenerLink systems and No indicates the generator is not compatible for use with the GenerLink system.

Not all generators are compatible with a GenerLink transfer switch due to plug type, wattage, voltage and/or GFCI. If you need assistance with generator verification, please call 800-886-3837. Due to manufacture changes, this list may not be 100% accurate. Global Power Products will not assume any responsibility for customers having a generator not compatible with a GenerLink. If you are interested in a generator that is not on the list, please forward the manufacture name and model number to info@globalpowerproducts.com and we will research it for compatibility.

May-22

Manufacturer	Model Number	Watt	Plug Type	Compatible with 30A Unit	Compatible with 40A Unit	Notes
AC Delco	AC-G0002	3,000	L14-30	Yes	Yes	Bonded Neutral
